Energy Performance Certificate

10a Seaford Avenue,
NEW MALDEN,
KT3 6JP

Dwelling type: Top-floor flat
Date of assessment: 17 May 2010
Date of certificate: 17 May 2010
Reference number: 8120-6025-7550-0603-1996
Type of assessment: RdSAP, existing dwelling
Total floor area: 58 m²

This home's performance is rated in terms of the energy use per square metre of floor area, energy efficiency based on fuel costs and environmental impact based on carbon dioxide (CO₂) emissions.

Energy Efficiency Rating

Current: 65 Potential: 72

Environmental Impact (CO₂) Rating

Current: 59 Potential: 67

England & Wales

The energy efficiency rating is a measure of the overall efficiency of a home. The higher the rating the more energy efficient the home is and the lower the fuel bills are likely to be.

The environmental impact rating is a measure of this home's impact on the environment in terms of Carbon dioxide (CO₂) emissions. The higher the rating the less impact it has on the environment.

Estimated energy use, carbon dioxide (CO₂) emissions and fuel costs of this home

	Current	Potential
Energy use	324 kWh/m ² per year	252 kWh/m ² per year
Carbon dioxide emissions	3.1 tonnes per year	2.5 tonnes per year
Lighting	£45 per year	£30 per year
Heating	£603 per year	£416 per year
Hot water	£87 per year	£87 per year

The figures in the table above have been provided to enable prospective buyers and tenants to compare the fuel costs and carbon emissions of one home with another. To enable this comparison the figures have been calculated using standardised running conditions (heating periods, room temperatures, etc.) that are the same for all homes, consequently they are unlikely to match an occupier's actual fuel bills and carbon emissions in practice. The figures do not include the impacts of the fuels used for cooking or running appliances, such as TV, fridge etc.; nor do they reflect the costs associated with service, maintenance or safety inspections. Always check the certificate date because fuel prices can change over time and energy saving recommendations will evolve.

To see how this home can achieve its potential rating please see the recommended measures.

Remember to look for the energy saving recommended logo when buying energy-efficient products. It's a quick and easy way to identify the most energy-efficient products on the market.

This EPC and recommendations report may be given to the Energy Saving Trust to provide you with information on improving your dwelling's energy performance.

Energy Performance Certificate

10b Seaford Avenue,
NEW MALDEN,
KT3 6JP

Dwelling type: Ground-floor flat
Date of assessment: 17 May 2010
Date of certificate: 17 May 2010
Reference number: 9338-1051-6245-7480-0984
Type of assessment: RdSAP, existing dwelling
Total floor area: 79 m²

This home's performance is rated in terms of the energy use per square metre of floor area, energy efficiency based on fuel costs and environmental impact based on carbon dioxide (CO₂) emissions.

Energy Efficiency Rating

Current: 62 Potential: 77

Environmental Impact (CO₂) Rating

Current: 60 Potential: 74

England & Wales

The energy efficiency rating is a measure of the overall efficiency of a home. The higher the rating the more energy efficient the home is and the lower the fuel bills are likely to be.

The environmental impact rating is a measure of this home's impact on the environment in terms of Carbon dioxide (CO₂) emissions. The higher the rating the less impact it has on the environment.

Estimated energy use, carbon dioxide (CO₂) emissions and fuel costs of this home

	Current	Potential
Energy use	282 kWh/m ² per year	184 kWh/m ² per year
Carbon dioxide emissions	3.7 tonnes per year	2.4 tonnes per year
Lighting	£60 per year	£42 per year
Heating	£570 per year	£383 per year
Hot water	£126 per year	£95 per year

The figures in the table above have been provided to enable prospective buyers and tenants to compare the fuel costs and carbon emissions of one home with another. To enable this comparison the figures have been calculated using standardised running conditions (heating periods, room temperatures, etc.) that are the same for all homes, consequently they are unlikely to match an occupier's actual fuel bills and carbon emissions in practice. The figures do not include the impacts of the fuels used for cooking or running appliances, such as TV, fridge etc.; nor do they reflect the costs associated with service, maintenance or safety inspections. Always check the certificate date because fuel prices can change over time and energy saving recommendations will evolve.

To see how this home can achieve its potential rating please see the recommended measures.

Energy Performance Certificate

10 Seaford Avenue, NEW MALDEN, KT3 6JP

Dwelling type: Ground-floor flat
Date of assessment: 14 November 2016
Date of certificate: 15 November 2016
Reference number: 9046-3972-7239-4186-4974
Type of assessment: RdSAP, existing dwelling
Total floor area: 30 m²

Use this document to:

- Compare current ratings of properties to see which properties are more energy efficient
- Find out how you can save energy and money by installing improvement measures

Estimated energy costs of dwelling for 3 years: £ 1,296

Over 3 years you could save: £ 381

Estimated energy costs of this home

	Current costs	Potential costs	Potential future savings
Lighting	£ 90 over 3 years	£ 99 over 3 years	You could save £ 381 over 3 years
Heating	£ 801 over 3 years	£ 366 over 3 years	
Hot Water	£ 405 over 3 years	£ 450 over 3 years	
Totals	£ 1,296	£ 915	

These figures show how much the average household would spend in this property for heating, lighting and hot water and is not based on energy used by individual households. This excludes energy use for running appliances like TVs, computers and cookers, and electricity generated by microgeneration.

Energy Efficiency Rating

Current: 67 Potential: 77

The graph shows the current energy efficiency of your home.

The higher the rating the lower your fuel bills are likely to be.

The potential rating shows the effect of undertaking the recommendations on page 3.

The average energy efficiency rating for a dwelling in England and Wales is band D (rating 60).

The EPC rating shown here is based on standard assumptions about occupancy and energy use and may not reflect how energy is consumed by individual occupants.

Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years
1 Floor insulation (suspended floor)	£800 - £1,200	£ 162
2 High heat retention storage heaters	£400 - £600	£ 222

To find out more about the recommended measures and other actions you could take today to save money, visit www.gov.uk/energy-grants-calculator or call 0300 123 1234 (standard national rate). The Green Deal may enable you to make your home warmer and cheaper to run.
