Lincoln County Government, NC
Public Records

**A message was sent
to you regarding
record request
#24-256:**

I couldn't find any records of a
septic tank I also checked with
Public Works for a sewer tap and
they don't have any records. I would
get a septic contractor out to take a
look and probe the area to try and
find a system.

Awesome, I just signed and should be good to go! We do not have septic documents. The cover is exposed in the rear of the building though we had got it pumped out when we bought the building in 2021.

Thank you,
Brittany

I had to fill it out by hand and scan it in and resent it via docuSign (not sure why the text would not show up)

You should have received the updated form to sign and return.

Also do you have documentation in regards to the septic? Septic permit/ placement on the property?

Thank you
